

ARX Access Barrier

The ARX Access Barrier is designed as a temporary, surface mount vehicle parking/ access barrier suitable for road closures and entries to temporary parking areas etc.

The ARX Access Barrier is available as an independent unit or can also be used in conjunction with TVCB concrete blocks with special adapters.

Various widths are available up to 4.3m with one single boom arm and longer widths may be possible with a sleeved solution.

The units are fully manufactured in the UK and available in a powder coated finish.

High Security Temporary Fence Systems,
Vehicle/HVM Barriers & Crowd Control Products

Key Features

- Full steel and aluminium construction
- Levelling feet can be added if required
- Balance weights can be added/removed
- Pedestal unit fitted with fork lift pockets
- Boom locking solution for pedestal and receiver
- Boom is easily removed for storage and transport
- Warning and safety decals can be added as required
